International PhD School on Radiography Techniques and Analysis: What can we learn from Images?

September 24-28, 2012 - University of Copenhagen

The school is part of the PhD Program of the University of Copenhagen and is limited to 20 students to be selected from the applications received. There is no fee for the participants.

The classes are structured as follows. The mornings will be devoted to lectures given by experts in the field, which will focus on the scientific potential of the imaging technique as well as on the understanding of the data analysis process. The process of data reduction will take place in the afternoons under close supervision of the lecturers.

Students fulfilling all the requirements of the classes will get 5 ECTS for this course.
