

## Transition to Turbulence

Contribution ID: 8

Type: **not specified**

### Young session

*Monday, 23 October 2017 15:00 (1 hour)*

Hong-Yan Shih: "Universal finite-size scaling in the laminar-turbulent transition"

Keiichi Tamai: "How to examine universal scenario of transitions to sustained turbulence"

Gaute Linga: "Investigating the transition to turbulence in rough geometries"
