

Combining SPH and MCRT for the study of ionising stellar feedback

Maya Petkova
Heidelberg University

Collaborators:

Ian Bonnell
Jim Dale
Bert Vandenbroucke
Guillaume Laibe
Diederik Kruijssen

Types of radiation-hydrodynamics:

Difusion

e.g. Lucy 1977, Brookshaw 1994

Flux-limited difusion (FLD)

e.g. Levermore & Pomraning 1981, Kolb et al. 2013

FLD + ray tracing

e.g. Kuiper et al. 2010

...

Monte Carlo Radiative Transfer

- **MCRT + grid**
Harries 2015
- **MCRT + moving mesh**
Vandenbroucke & Wood 2018
- **MCRT + SPH**

Star Formation Simulation

- Total mass of $10^4 M_{\odot}$
- 10^6 SPH particles
- Ionisation from stars with $M > 20 M_{\odot}$

Star Formation Simulation

Summary
