Tools for sharing your code and basics of cloud computing

Thursday 10 February 2022 09:30 (1 hour)

We will mainly discuss the use of GitHub and Binder to make software more accessible to the astro-community (and beyond).
We *might* try an interactive example of multi-user code development (repository "fork" and "push request").
In that case, it would be helpful (but not mandatory) if you have a GitHub account already in place.
