Exercise3

How to make a movie.

- put all your snapshot file in a file called file.list LS SNAPSHOT_??? > FILE.LIST

- download shell_smooth and shell_tipsy

- run SH SHELL_SMOOTH. This will produce a file called "todo"

- run SH TODO

- run SHELL_TIPSY. This will produce a file called "todo3"

- run TIPSY

- when you get the tipsy prompt just type
  READMACRO TODO3
  MACRO MOVIEMACRO

at this point you have several .ppm file on your computer that you can combine in a movie.
