

The 9th International Cambridge Workshop on Magnetic Reconnection 2012

Monday 27 August 2012 - Thursday 30 August 2012

Niels Bohr International Academy

Scientific Programme

The number of participants will be limited to about 35 participants, allowing ample time for both presentations and discussions.

The head lines of the topics discussed at the meeting will be:

Three-Dimensional Magnetic Reconnection

Structure and Instabilities of Current Sheets

Turbulent Reconnection

Reconnection in Line-Tied Systems

If your talk doesn't fit directly inside any of these headlines, please let us know as we will be flexible in putting together the program.
